

MMW ANALOG COUPLER COMPONENT

IN:-10..+10V/(0)4..20 mA - OUT:0..10V/(0)4..20 mA

INPUT: 0...5 V DC, 0...10 V DC, ±10 V DC

INPUT: 0...20 mA, 4...20 mA Spring clamp terminals

Input, output, and supply voltage galvanically separated

Due to an integrated current limiter on the output, the output is short circuit and overload protected. A special characteristic of the MULTI Converter Art.-No. 6644207 includes: Analog voltage signals 0...5 V/0...10 V and -10...+10 V and current signals 0...20 mA and 4...20 mA, these compact modules can be galvanically isolated in the three standard signals, which means all combinations are covered with one model. The selection of the input is done by means of a 5pole rotary switch, accessible under the identification tag. The voltage supply is galvanically isolated from the input and output circuits (3-way isolation).
